ZEVAZ
SB E FO CI SRC

SIZE RANGE
UK3-13 (EU36-48)

CERTIFICATION
EN ISO 20345:2011

WIDTH FITTING
eeee

The Zevaz is an ultra-lightweight wellington boot that combines the latest in polymer technology with the highly acclaimed Anvil Traction slip resistant outsole.

The Upper polymer material is an expanded foam full of air, which acts as an excellent thermal insulator and has been tested and approved to CI standards. The air filled polymer construction offers outstanding comfort for the wearer and reduces both muscle fatigue and stress over the course of a working day with the EVA Energy formula offering superb underfoot impact absorption, providing added rebound energy between steps.

S

WATER RESISTANT FOOTWEAR

UPPER
An EVA upper that is both extremely lightweight and has been tested and approved to CI standards.

LINING
The Zevaz wellington has been designed specifically without a lining in order to ensure that the boot can be easily and quickly dried should the need arise to rinse the inside of the boot.

PROTECTION
Outstanding steel toecap protection.

FOOTBED
To ensure maximum wearer comfort the Zevaz wellington features a 'massage footbed' that aids blood circulation, reducing tiredness and fatigue.

OUTSOLE
The 'Anchor' is a fuel oil resistant rubber outsole with a wider cleat pattern to avoid clogging in areas of high contamination. It exceeds minimum average SRC requirements by 48%.

SLIP RESISTANCE

exceeds minimum average requirement by +48%

Minimum average req. 0.23

ANVIL TRACTION average result 0.34
