Feature	Duo-spherical lens with integrated brow guard	Unique side-arm hinge design	Unique injection moulding process combines firm and soft side-arm zones	uvex supravision excellence: permanent anti-fog coating on the inside and scratch resistant on the outside of the lens	'Designed-in' balance Features and low weight
					
Advantage	High base curve gives excellent peripheral vision. Reduces risk of particle ingress.	Smooth secure opening and closing. Fail safe design.	Firm where it needs to be. Low pressure proximal to the ears and soft grip.	Permanent anti-fog performance, durable hard coat, extended fog free time.	Excellent nose bridge stability and comfort.
Benefit	Enables precision working. Reduces the potential for optical fatigue. Reduces the potential for injury.	Metal-free, perfect for ESD compliance. Robust hinges extend product life.	Stable, non-slip fit. Pressure free, high comfort.	Durable, long in-service style. Excellent life-cost profile.	Ultra stable and low nose bridge pressure creates high comfort factor.
