

DID YOU KNOW***1 in 4 people need corrective eyewear?***

However, if you have a requirement for safety eyewear, then it's more than likely that you will also need prescription safety glasses for some employees – the two go hand in hand.

Prescription safety eyewear is often overlooked and perceived as difficult to administer however, **Guardzman** are pleased to partner with uvex, to provide its customers with safety and VDU prescription eyewear.

ORDERING ONLINE WITH UVEX

The uvex online ordering process is easy, fast and seamless. Using the online ordering service from uvex allows you to order prescription eyewear when you need to, it's a 24/7 service. You will be invoiced by Guardzman in the same way as your other purchases, there is no voucher system like other prescription providers, and you only pay for the value of the order. There is no loss of money due to unused/expired vouchers, it offers reduced administration time due to not having to claim back unused voucher credit and the Authorising officer has visibility and control of the process throughout.

HOW DOES IT WORK?

- Customers are given a secure log in and password to the uvex system
- If your company has multiple sites and require more than one Authorising Officer to be able to log in – no problem! uvex can set this up for you
- The new order process could not be easier – step by step instructions, with mandatory fields indicated
- When the order is completed, print off self-generated PDF or email it to the relevant employee
- The employee takes the printed PDF to optician for a sight test, if needed
- Orders are stored on-line in the database for referral at any time

uvex

A completely new range of VDU frames and the addition of contemporary safety frames

uvex offers a choice of metal, plastic and wraparound frame styles in single vision, bi-focal or varifocal for safety or office use. All frames come with scratch resistant coatings, slip-in spectacle case and lens cleaning cloth.

Sporty, wraparound plastic frames with protective functions integrated into the frame design.

Classic style metal frames with transparent side shields and adjustable TPE ear pieces.

VDU spectacles in metal, plastic and rimless frame design options.
